**Adaptive method of automatic abstracting and indexing.**  
[in *Proc. of the IFIP Congress 71*, Vol. 2, C. V. Freiman  
(Ed.), North-Holland, Amsterdam, The Netherlands, 1972,  
1179-1182. See main entry *CR 14*, 3 (March 1973), Rev.  
24,630.]

A method is described for selecting sentences from the full text of a document to produce a document extract. The semantic relation between sentences is characterized as a graph model, and statistical measures are employed to compute the relative importance of each sentence in the text.
